## PROJECTS

**Driving License Portal | January 2024 - February 2024**- The Driving License Portal is a comprehensive platform designed to streamline the process of applying for learning and permanent driving licenses. It offers users the convenience of applying for licenses, scheduling exams, and accessing mock tests for preparation. Additionally, the portal facilitates seamless interaction between users and Regional Transport Office (RTO) officers for application approval/rejection. Users can register on the portal by providing necessary details and creating a profile. Users can apply for a learning license by filling out an online form with required information. Upon fulfilling the criteria for a permanent license, users can apply through the portal. They can schedule their driving license tests through the portal. Options to choose the preferred date, time, and RTO center will be provided. The portal will offer MCQs mock test for the learning license. Users will receive notifications at various stages of the application process, including application submission.

### Secure Data Transfer And Detection In Cloud Computing | March 2023 - June 2023

- Cloud computing, an emerging and very promising computing paradigm, connects large-scale distributed storage resources, computing resources and network bandwidths together. By using these resources, it can provide high-quality cloud services. Due to the attractive advantages, the services (especially cloud storage service) have been widely applied, by which the resource-constrained data owners can outsource their data to the cloud server.
